

Mr. Sarni is founder and Chief Executive Officer of DOMANI with 30 years of experience in providing sustainability and environmental consulting services to global private sector companies. Over the past 10 years he has successfully built a consulting firm focused on providing innovative yet practical sustainability technical and business solutions to multinational firms committed to increasing revenue, mitigating risk and improving operating efficiency through the implementation of sustainability programs.

Mr. Sarni is personally focused on providing strategic services to global companies in the areas of climate/carbon, sustainability strategy development and implementation and sustainable development (land use and green building/LEED). He has worked closely with companies such as Alcoa, BASF, Cisco, The Coca-Cola Company, Dean Foods, DIAGEO, Cherokee Investment, Enterprise Community Partners, Forest City Enterprises, Invensys, NTT DATA, Pfizer, TNK-BP, Vivendi and Wrigley in developing and implementing sustainability strategies that provide the greatest tangible and intangible (brand) value to organizations. He has a practical yet creative approach in implementing sustainability programs and integrating diverse business and technical issues related to energy, climate change, sustainable land use, and strategy/ reporting/branding.

Mr. Sarni is a Member of the Environmental Compliance Committee of the Chicago Climate Exchange (CCX) and active with The Conference Board. He frequently speaks on a range of sustainability issues and authors a bi monthly editorial column on sustainable business practices in Venture Magazine and the Sustainable Life Media "Climate Management Weekly." He is a contributor on Sustainable Development for the book "Environmental Regulation of Colorado Real Property" and is the author of the forthcoming McGraw Hill book titled, "Greening Brownfields: Remediation through Sustainable Development."
